Prime Minister

MESSAGE

I am happy to learn about the 12<sup>th</sup> World PetroCoal Congress 2022 and 3<sup>rd</sup> World Future Fuel Summit 2022 being held in virtual mode. The initiative by the Energy and Environment Foundation, in association with NITI Aayog, to hold the three-day congress is laudable.

Energy sector plays an important role in the nation's progress, enhancing the ease of living and ease of doing business. We have implemented far-reaching reforms to transform the sector.

Energy security remains the primary focus of our efforts. With a judicious mix of conventional and clean energy sources like solar, wind and hydel energy, our energy plan is growth-oriented and environment conscious.

As a nation, we have always been driven by the spirit of global good and a human-centric approach. Marching on the path of development, glorious tradition of our land shows us the way when it comes to caring for the environment.

Today India is among the top 5 countries in the world in terms of renewable energy capacity. Share of non-fossil sources in India's installed capacity of electricity has increased significantly.

India's transition from conventional energy sources to renewable sources of energy is guided by the approach of Access, Efficiency and Evolution and our unwavering commitment to fight the menace of climate change.

I am sure that the gathering of global leaders in the energy sector will hold extensive deliberations on drawing up a strategic, environment-friendly roadmap for the energy sector.

Best wishes for all success of 12<sup>th</sup> World PetroCoal Congress 2022 and 3<sup>rd</sup> World Future Fuel Summit 2022.

(Narendra Modi)
